

GO / NO-GO JURY PROCEDURE

TO BEST PREPARE YOUR PRESENTATION

GO / NO-GO JURY PROCEDURE

document name: every file in a “go-nogo” subfolder
repository: the Github repository associated with your E.I.P.

Context

For 1 year, you've been working on your end-of-study project (EIP), tackling multiple aspects at the same time:

- ✓ functional progress of the project
- ✓ development of skills linked to your EIP's inside track (entrepreneurship, solution, technical)

Objectives

The purpose of the **Go / No-Go jury** is to take stock of your project's progress 1 half-year before its completion.

It will be an opportunity to determine whether :

- ✓ **your project is on track**, with the implementation of expected functionalities
- ✓ **the KPIs** for your track have been seriously addressed.

The outcome of this jury will determine whether your end-of-study project can be pursued without jeopardizing the success of your studies (in other words, whether your project can be completed on time and to the expected quality level) or must be stopped.

Requirements

Your **Beta Test Plan** document will be the reference document for the functionalities expected by the jury.

It has been validated with your educational advisor, who will have forwarded it to the jury via the EIP website.

In order to be validated, your KPIs must be confirmed by a set of evidence elements, which you will place on your project's Github repository, in a **go-nogo** subfolder.

In order to adapt to each project, context and domain, we don't impose a specific report format for these elements of proof.

However, we do expect the information to be organized, professionally presented and easy to understand.

We have chosen the PDF file-format to ensure a quick and efficient consultation experience for jury members.

Course

Total duration: 45 minutes with mandatory offline presentation support (Powerpoint or PDF file format)

Background presentation: 5 min

A brief presentation of your project, its objective, target and ambitions.

KPI presentation: 10 min

You will present your work on the various KPIs associated with your track project (Entrepreneurial, Solution or Technical).

Demonstrations based on BTP Use Cases: 20 min

The jury will ask you to demonstrate one or more of the Use Cases in your Beta Test Plan, to check on the progress of your project.

Questions from the jury: 10 to 15 min
