

## Conventional Commits

The commit message should be structured as follows: <type>[optional scope]:  
<description>  
[optional body]

[optional footer(s)] The commit contains the following structural elements, to communicate intent to the consumers of your library:

*fix*: a commit of the type fix patches a bug

*feat*: a commit of the type feat introduces a new feature

*docs*: changes to the documentation like README

*style*: style or formatting change

*perf*: improves code performance *test*: test a feature

*Examples*: feat(api): send an email to the customer when a product is shipped

docs: Fixes typo on in-from-the-depths.md
